Role Definition

Job Title: Principal Mechanical Engineer

Reporting to: CEO.

Location: Holborn office, London

An opportunity for a Principal Mechanical Engineer to join our close-knit team to develop their project management experience of leading MEP projects.

The successful candidate will support the operation of the business to assist in the overall delivery of mechanical workload. They will be responsible for managing their team's allocated resource and time. A desire to deliver technically excellent and sustainable MEP solutions for our clients MEP requirements is paramount.

The candidate must have a positive outlook and be flexible and adaptable to changing times. A strong communicator who is professional and client-focused and able to maintain resolve under pressure.

Based in our London office, the successful candidate will be working on a variety of projects from our current portfolio and will work under the supervision of the CEO..

You will be required to travel to our Basingstoke office from time to time, to project sites, or to the offices of our design team collaborators for meetings and workshops as necessary.

Required Skills
